ATOSHI

ATOSHI FAQ

Empower The World

Denationalization of money

1. What is ATOS?

Atoshi (ATOS in short) is a cryptocurrency created for diverse usage between countries. The theoretical foundation of Atoshi is in the book of Friedrich Hayek(Nobel Prize winner in economy) "The De-nationalization of Money." We believe that the currency used between countries should not be issued by a certain country but by blockchain technology and controlled by the people from all over the world.

ATOS is a new cryptocurrency for and by everyday people you can “mine” (or earn) from your phone. While most cryptocurrencies (like Bitcoin) have been very difficult for everyday usage and access, ATOS puts the power of cryptocurrency into the palm of your hand.

And everyone can use Atoshi network to issue tokens without knowing any coding language and pay ATOS as the transaction fees in any industries. Then ATOS will become popular in daily use.

In the end, it will become a crypto currency with 0 transaction fees, transfer speed under a second to any part of the world. Atoshi, a limited strong currency is the best option to store value, increase value and ease the life for the people around the world.

2. How can you make money from Atoshi?

1)From Price increase. Atoshi official website will continue to update prices according to the progress of the project. People who got Atoshi in the early stage can sell their holding of Atoshi by sharing our Apps and sell ATOS on the OTC market. ATOS are still in the early stage and inexpensive but with potential increase in value of 1000 times - to couple dollars per coin and more.

2) From connecting people: Invite new users to register on our App, buy products from Atoshi App, etc. and you will receive a dividend of 8-32% of sales revenue. The highest monthly income exceeds 16000 USD and she is an old employee of a government enterprise. We also reward our users with luxury brands and gifts like Tesla and many other prizes. For details, please check our official website: atoshi.org, and click on how to get ATOS.

3. How does Atoshi increase its value?

Standing on the shoulders of giants, Atoshi will have merits of gold and bitcoins and improve their shortcomings. Gold and Bitcoin are very valuable, so ATOS can be very valuable as well. As long as we solve some of the shortcomings of gold, Bitcoin and other encrypted currencies,

learn from them but better than them, it will be recognized slowly, and then our value may increase thousands of times.

Apart from R&D and operating costs, 50% of the Atoshi Project income will be invested in cryptos, 20% in angel investments, and 30% in high-potential stocks and real estate. 30-50% of annual investment profits will be used to buy back Atos.

Our angel-invested companies are required to accept Atoshi for payment. In this way, we will hold a lot of shares in high-growth companies and become a giant block chain investment bank.

Google is strong because it invested in many companies. The companies in which we invest will use Atoshi as a means of payment with priority and discount, forming a multi-industry wide application of Atoshi and become a world currency.

Bitcoin, ETH and so on have no real assets to support, not “strong enough” , Atoshi will have a lot companies to back up. Bitcoin has increased 26 million times. Atoshi stands on the shoulders of these giants for better innovation may have a huge potential as well.

4. What are the main steps of Atoshi now?

At present, the main steps: Atoshi Apps

Atoshi Apps uses blockchain to empower online shopping/Hotel ticket booking/online gaming/advertisement/blockchain authentication(onlinesince 2019-05-25).

Now Atoshi App exceeded 4 million users. App-startups are more than 1 million times per day and exceeded 30,000 orders each day.

Features:

1. Everyone can open online shop free of charge in Atoshi Mall.
2. Customers who buy products via our App will get Atos and Atoshi force as a gift;
3. Anybody can start his own business by sharing our App and they can earn more than 3000USD in a month. For example - mother with four children in Chengdu City, earned more

than 10,000 RMB in a month by sharing Atoshi App. Or one teacher from remote mountain area - makes more than three times of his salary by sharing the Atoshi App!

5. What is the next 10 years plan for Atoshi?

Blockchain industry will have the biggest company in the world. Atoshi is working hard and moving fast on that way already. The following are our 10-year plans:

- 1) Atos: A crypto currency to be improved based on other excellent cryptos like Bitcoin, Ethereum and aim to be one of the world best currency in future.
- 2) Atoshi Mall (Atoshi uses blockchain to empower online shopping; Everyone can open his own online store for free. Later, we will accept Atos as the store management fee; We will accumulate more than 100 million users from China, if the daily per capita sale is 1USD. The income can reach 100 million USD per day.)
- 3) Atoshi Pay (In Atoshi Mall, the seller's income can only be withdrawn after 15days(quality assurance day), and we may accumulate over 100 billion USD of funds pools, we can earn 5 billion USD interest income per year(5%); support various cryptos and fiat currencies, implanted in the exchange, support global instant payment)
- 4) Atoshi digital asset exchange
- 5) Online Games
- 6) Blockchain Copyright Confirmation and Decentralized Copyright (any picture, article, and audio-visual work can be proved by the blockchain). If you want to use any of those copyright items, you can use the Atos to unlock them)
- 7) Atoshi luxury brands (a super exclusive luxury brand)
- 8) Atoshi Investment Fund (investing in promising companies which must accept the Atoshi as discount payment. More investments, more users, more appreciation in ATOS. With all this we will have more funds to invest in more high-quality enterprises.

6. What is the use of Atos?

Atos aim to be a cryptocurrency between countries, based on Hayek(Nobel winners)'s "Denationalization of Money." In order to become the world currency, the Atoshi will have a wide application:

A list of applications based on Atoshi Mall:

- 1) Atoshi Mall. The APP opens more than 6 million times daily, and has more than 30,000 orders per day. Open online store need to deposit Atos and pay the management fee will receive 80% discount.
- 2) Atoshi pay. In Atoshi pay, you can pay with various cryptos and fiat currencies, and also exchange each other. The exchange fees can have discount if you pay with Atos.
- 3) Atoshi Exchange. After Atoshi Mall accumulated tens of millions of users, we will open our own crypto exchanges. Millions of users will exchange Atos on our exchange platform. Atoshi can be used for voting and pay transaction commission with a discount priority.
- 4) Atoshi Investment. We will invest in the world's best future companies with the profit of Atoshi Mall, Atoshi Pay, Atoshi exchanges, and Atos. The investment agreement will be signed to require the invested company to accept the Atos for discount payments. In return, we will have a lot of business accepting Atos as a payment

Other apps:

- 1) Encryption software, VPN, video editing and other small software payment can get a discount.
- 2) Game software will receive a certain discount on the purchase of Atos. And good players will also get Atos as a reward.
- 3) Issue smart contracts on the Atoshi, you don't need to understand the code, you just need to click on the menu, anybody can issue coins or run smart contracts. This token operation and smart contract must be paid by Atos.
- 4) Embed ipfs on the Atoshi, distributed file storage will be paid by Atos.
- 5) The unique POD algorithm of the Atoshi, each user contributes twice the computing power of his own computing power to obtain a free transfer service, forming a huge pool of computing power. The more users, the faster the calculations. In theory, the Atoshi can run an unlimited amount of Dapp. All industries can develop and apply in our chain in the future, and build a comprehensive ecology covering all aspects of social life. Each ecology can be paid by Atos.
- 6) Finally, Atos will be the underlying operating system in the blockchain, which means that various Dapps can be developed on the Atoshi, and the user interface is very friendly and simple, just as simple as clicking the mouse on your windows system. In this case, each industry can develop its own chain in our Atoshi, parallel chain with the Atoshi.

7. How to get some Atos?

- 1) Invite a friend to register on Atoshi app, and each party will get reward of 800 ATOS and 100 Force.

2) The Force can produce a certain amount of Atos per day. Invite friends and shopping online to get the Force.

3) Please visit our website: www.atoshi.org download App to purchase related products and services, we will give you the Atos and Force(now this function only available in China and English market to open available soon)

4) If you are a non-Chinese mainland resident, you can go to our English website and download app and click on the purchase directly.

8. What is IMFO?

IMFO is a community that uses blockchain to create a world currency. "I" stands for International, "M" stands for Monetary, "F" stands for Freedom, "O" stands for Organization, and IMFO means: "A International community that aim to create a world currency." We use blockchain technology to write history. Our members are a group of pioneers who want to change the world. We are armed with missions and beliefs. We lead revolutions in the world financial systems by blockchain technology. (Our web for more details: <http://imfo.world/>)

9. Why IMFO?

We use blockchain is to deliver fairness, safety, speed and easiness among international transactions, of which Bretton Woods System failed 50 years ago; It aims to enable fairness among nations with a money that is generated by decentralized network and controlled by the people of the world.

It will be a brand-new chapter that we are about to start. For challenges down the road and setbacks yet to come, we must be united by common faith to write history.

10. What sparked the idea of IMFO?

When we export our products, the money we get is a piece of paper called U.S. dollars. This paper can be printed more each year to dilute our assets, which is just like a robbery disguised under a civilization mask. We need to end this kind of robbery and unfairness. We recall all like-minded talents to join IMFO to make the world a fair place.

11. Are there any conflicts with countries who issue its own currency?

IMFO is here to make the world a better place. Firstly, each sovereign country should be stable and prosperous. The government of each country should have the solemn power to issue its national money so that they can build their country better.

However, there is still the need for a better currency for the transactions between countries. This currency should be crypto based on decentralized blockchain and in control of the world by technology. IMFO is trying to create one of that crypto to be a world currency.

12. What are the requirements to join IMFO as a member?

You should understand IMFO's mission and value "Life, Freedom, Property, Fairness, IMFO" We are pioneers who want to change the world!

Willing to contribute to this mission? Steps to join:

- 1) .Complete a join test (Test link can be found: www.imfo.world)
- 2) .In front of the flag of IMFO, hold high your right hand and take the join Oath solemnly :
"I volunteer to join IMFO to solve the financial hegemony with technology and safeguard the life, freedom, property and fairness of people of the world. I will dedicate all efforts, across all difficulties and struggle till the end." More info, please contact our customer service whatsapp: [+971528888968](https://www.whatsapp.com/business/collections/971528888968)

13. What are benefits of IMFO members?

With any action helping IMFO, you will be rewarded. For example if you write an article and publish it on the internet and a lot of people will see it. Or if you make a Youtube video about us with thousands of views... Or if you help to promote our project by spreading the word, you will be rewarded as well.

Elect and be elected as the leader of the IMFO.

"End financial hegemony by blockchain" and "Create a better crypto for the world ", improve payment and production efficiency, create history together with us.

14. What is the relationship between IMFO, ATOS and Atoshi?

Atoshi is a decentralized blockchain network and it is a tool for IMFO to realize its mission: A Future World Currency. ATOS is the value unit on Atoshi network and is a more advanced and innovative crypto currency standing on the shoulder of bitcoin and other excellent crypto currencies.

15. How to make everybody know Atoshi?

Through our Apps, community, media, word of mouth...large scale effective publicity. For example: on April 20, 2020, CEO Liao Wang's live broadcast, there is 3.25 Million people watched on line.

For our great mission, we call on more volunteers to join IMFO.

In Atoshi App, our user can get Atos and Force as reward, as well as cash rewards, many of the members get income more than 3000 USD per month.

By 2020-May-02, Atoshi have around 4 million users and 10000 decentralized communities organized by our users at their will.

16. Isn't crypto a big bubble now?

Investment in cryptos goes way beyond traditional logic and methodology; Donald Trump and his father together spent more than 100 years to earn 5 billion; Jeff Bezos spent 20 years to be the richest; 19-year-old programmer Vitalik Buterin made 5 billion by writing a program called Ethereum; Chris Larsen founder of Ripple become one of the richest man in the world in 5 years.

Crypto pioneers shock investors that traditional investment theories and experiences become irrelevant and useless; value increase goes beyond common sense. If you think it is a bubble and do not to invest, the price will be double ...then it will go up 10 times, if you still don't buy it, it will go up 100 times or even more. Litecoin went up 7500 times, Ethereum went up 5000 times, Bitcoin increased 26 million times since 2009.

Cryptos are still in infancy, the whole market cap now is 324 Billion but the world totally running currency cap is hundreds of trillions. Cryptos still have a chance to grow by thousands of times.

17. Is ATOS risk-free?

ATOS is the “iPhone” in digital currency, aim to be a cryptocurrency used for transaction between countries; there are hundreds trillion transactions between countries, yet there is only 100 billion ATOS. Even if 1USD/ATOS, it is still less than 1% of hundred trillion.

There is risk in everything, we do suggest not to invest more than 10% of the asset or one-month income. If the price went up 10000times, you become super rich, if the project will fail, the lost is affordable.

18. Will 100 billion coins be too much? Hardly reliable?

Were Ripple reliable when its value increased 350 times in 2017 after issuing 100 billion coins? The answer is obviously no. ATOS is for transactions between countries, for 7.3 billion people worldwide, each person holds average 14 ATOS only.

19. What's will be the technical breakthrough of ATOS?

Fast transaction; no transaction fees; no electricity wasting; highly decentralized, contribute computing power instead of competing, less risk and anti-crime.

20. What benefits ATOS is offering?

ATOS is anti-inflation, reserve value, has no transaction fee with instant transactions. The blockchain act as same as the circulation of gold or dollar which is value exchange. It not only inherits merits of gold, dollar and bitcoin, but also will improve their defects:

Gold is too heavy and to carry and not easy to store. ATOS as a crypto can support majority crypto wallet. It be be stored in a computer, a mobile, a usb or even a piece of paper.

Cryptocurrency mining causing significant electricity & computing capacity wastage. ATOSHI will use POD instead of POW ...it required all users to contribute computing power witch is more eco.

Cryptocurrency mining causing centralization of the computing capacity; POD algorithm will have no central at all because it is not competing but contribution.

High transaction cost for Gold and bitcoin. But in Atoshi it will become free transaction fee if you contribute the computing power.

Bretton Woods System failed to deliver a trustworthy payment system between countries; Blockchain technology is the right tool to solve it and Atoshi is on the way.

21. How can ATOS increase its value?

Standing on the shoulders of giants like Bitcoin/Ethereum, Atoshi will have the advantages of gold and Bitcoin, while improving their shortcomings. Gold and Bitcoin are extremely valuable, so ATOS can also be extremely valuable. Value-adding is very simple. You only need to solve some of the shortcomings of gold, Bitcoin and other cryptocurrencies. If you solve problems one by one, it will be easier to use than others and more popular in future.

The capital raised by selling ATOS, after research and operating expenses, 50% of the remaining capital will be invested in various cryptocurrencies, 20% into angel investment, 30% into high potential stocks and real estate. Annual investment profit of 30-50% will be used to buy ATOS back from the market

All our invested companies must accept Atoshi for payment and should give discount to whoever pays with ATOS. In this way, Atoshi will become more and more popular and become a giant blockchain investment bank.

Google has invested in a lot of companies, Atoshi will do the same. The companies we invest in will accept Atoshi as discount payment. This will form a multi-industry and wide range usage of Atoshi. In the end Atoshi may become dominant currency with limited supply and become a popular world currency.

At present, Bitcoin, Ripple, Ethereum, etc. are not supported by physical assets, not enough "hard", our Atos will be "hard" enough. Bitcoin has increased by 26 million times and Ripple by 300 times. Atoshi stands on the shoulders of these giants with new innovations and has big potential.

22. Where are your team member base?

We are a decentralized team collaborates through internet. As of today, team members are spread out across China, USA , UAE , United Kingdom, Japan, Slovenia, Croatia, etc.

23. How your team strives maximum to achieve success of the project?

Founding team's part of ATOS is in freeze and allowed only 10% per year to be released, which means this part takes 10 years to fully unlock.

The most important mission for the founding team is to solve the pain point of the society and make the world a better place. Our names will be written in the history if we succeed. We summon those excellent talents to join IMFO to become a legend. (If you know somebody or you are IT geek, please contact us on WhatsApp: [+971528888968](https://wa.me/971528888968))

24. Is ATOS real? Is ATOS a scam?

ATOS is not a scam. It is a genuine effort made by a team of blockchain Pioneers who understand the future and believe in the power of blockchain to give people easy access to cryptocurrency.

We are a group of blockchain lunatics, a group of unwavering believers and hardworking doers. We cannot guarantee that the project will succeed. However, we do promise to work our hardest to make our shared dreams a reality, while maintaining the highest standards of integrity. We welcome you to join our community to empower the world with us.

25. Can I change the invitation relationship?

No, it is unchangeable. The invitation relationship represents the contribution to the community, and we respect every effort. Blockchain is developed and governed by the community. We thank everyone who has contributed to the community. Even if one is no longer active in the community or no longer optimistic about ATOSHI project, his or her contribution cannot be denied and forgotten.

26. What is the value of ATOS?

Today ATOS is worth approximately nothing which is similar to Bitcoin in 2008. ATOS's value will be backed by the time, attention, goods, and services offered by other members of the network. The price on atoshi.org is just a price set by the project team as advice price.

By pooling our attention, goods, and services around a common currency, ATOS's holders seek to capture more of the value that Bitcoins have shown us years ago. Today, we are laying the infrastructure for this digital currency and marketplace by distributing the currency, building the community, and developing the technology to ensure its security and bright future.

27. Can I withdraw my ATOS? What is the timeline for withdrawals?

No, you cannot withdraw ATOS yet. You will be able to withdraw ATOS or exchange it for other currencies in when ATOS transitions to a fully decentralized blockchain.

Now, ATOS balances are being recorded with a guarantee of being honored when ATOS transitions to mainnet . Transfers of Pi are restricted until we reach mainnet to prevent bad actors from accumulating ATOS from fake accounts. For example, a bad actor could mine from fake accounts, transfer ATOS to a legitimate account, and then pass through Pi's account verification process despite their illicit gains. We will start developing the mainnet when 60% of ATOS are distributed.

28. When will ATOS be worth something? When can I turn ATOS into “real” money?

ATOS's holders will be able to turn ATOS into “real” money by:

- 1) Directly purchasing goods and services with their crypto in ATOSHI APP
- 2) Exchanges: ATOSHI Team does not control when cryptocurrency exchanges (like Binance, Coinbase, Kraken etc.) decide to list ATOS on their platform. However, part of ATOS in ERC-20 tokens can be traded anytime.
- 3) OTC market. We have built ATOS transfer as red packet in our atoshi app. User can send ATOS for fiat currency through OTC.

29. Can I mine from more than one device? How does the network prevent fake accounts, bots, etc. from earning ATOS?

No, you cannot mine from more than one device. The network has a strict rule of one account per person. ATOS uses a multi-pronged strategy to ensure ATOS is not mined by fake accounts.

The network uses AI and Google's recaptcha to know if a device is operated by a human or a machine. (This technology is completely invisible to most users, since they are real humans). Over time, we are also developing a machine learning algorithm based on real users' mining behavior to prevent bots.

When ATOS launches mainnet, only accounts validated as belonging to distinct real individuals will be honored. In other words, even if all other methods missed out on some “bot” accounts, this user validation process will further eliminate them because bot owners will not be able to prove bots as real people with real names.

Ending Words:

Life, Freedom, Property, Fairness, IMFO” “Create a better crypto for the people”, to end finance hegemony is a historic event.

There are many problems with international payments. For example, transferring \$100,000 from Europe to China for purchasing normally takes three working days for the payment to be remitted. This hinders production efficiency... If a person is abroad and has a car accident, his life is in danger and he needs money for emergency surgery. Because international money transfer takes three days, his life may fade away!

IMFO and Atoshi is to solve the slow and expensive international transfer. (International transfers currently take 3-5 working days, but crypto can reach any corner of the world instantly).

If you feel busy and confused every day, you should ask yourself if you are wasting your time. If you want to pursue a historic career that you will never regret, join IMFO and Atoshi. We can together solve the social pain point, become legends and empower the world!
